REPORT OF THE ASBESTOS SURVEY

COF ECDD - 5013 Craft Street, Fayetteville, NC 28311

PURPOSE AND SCOPE

An asbestos survey was conducted on November 13, 2025. The purpose of the asbestos inspection of this structure was to locate the asbestos containing building materials (ACBM) to protect human health and the environment. Information in this report should be made available to persons that may come in contact with the asbestos containing materials (ACM) as a result of demolition, repairs, or a change in ownership.

PROJECT DESCRIPTION

A limited survey was performed on the interior and exterior space. No below grade inspection preformed. Not responsible for any ACBM found during demolition.

PROCEDURE

No building plans were available. I was given unlimited access to the Structure. During the walk-through, areas of suspect materials were identified. Representative samples of these materials were collected and analyzed via Polarized Light Microscopy by an NVLAP accredited laboratory.

RESULTS

As you review the data, you will find the following materials were determined to have ASBESTOS:

ACBM – Transite Siding complete structure, including the inside wall of garage
ACBM – Wall joint compound complete inside of structure, not the ceiling.

This structure has heavy fire damage and lots of personal contents

If this material is not rendered friable (reduced to powder by hand pressure, also interpreted as chipping, sanding, or grinding), the material does not have to be removed. If, however, this material is made friable, i.e. during demolition, replacement, or renovations, a North Carolina accredited asbestos abatement contractor should perform the removal. Any questions concerning the removal should be directed to the number listed below.

The NESHAP regulation dated Tuesday, November 20, 1990, Part III Environmental Protection Agency, 40CFR Part 61, requires that any building being renovated or demolished be inspected for asbestos containing building materials.

NOTE: If this structure is going to be demolished, or moved an asbestos permit application and notification for demolition/renovation is required by law to be mailed to the address below 10 working days prior to demolition or asbestos abatement activities.

An asbestos inspection is a judgement call based on the experience of the inspector. The survey is conducted by sampling substances known to contain asbestos or by sampling materials suspected of containing asbestos.

I the inspector assume no liability for asbestos materials that are not included in an asbestos inspection due to the material being inaccessible, concealed, or not considered suspect ACM. I the inspector assume no liability for the condition of the building materials before or after the inspection.

Sincerely,

JTL 10-18-2025

The Contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex, sexual orientation, gender identity, or national origin. Such action shall include, but not be limited to the following: employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship.
