

Infiltration Devices Maintenance Tasks and Schedule

TASK	SCHEDULE
Trash removal	Monthly
Remove unwanted vegetation	Monthly
Check observation wells following precipitation events to ensure proper infiltration	Monthly
Record water level in the monitoring wells	Monthly and after every storm event greater than 1.0 inch
Overall facility observation	Within 24 hours after every storm event greater than 1.0 inch
Maintain stone or mulch top surface	Yearly
Clean forebay if present	Yearly or at 50% full

Important maintenance procedures:

- The drainage area of the infiltration trench should be carefully managed to reduce the sediment load to the sand filter.
